

Tremco Incorporated certifies that the Paraseal GM sheet membrane system meets the physical properties per the Tremco Incorporated published data sheets, specifications, and application instructions.

Paraseal GM is approved by the **City of Los Angeles (COLA)** under research report number **RR25425**.

The following pertain to the Paraseal 20-Mil HDPE GM Membrane:

- 20-Mils of a high-density polyethylene sheet membrane, (HDPE).
- Sodium bentonite clay is laminated to the HDPE.
- The seams require the use of the Para JT Tape.
- Life Expectancy of HDPE depends upon the specific application, however it is measured in potential hundred year increments as independently published by others.
